

DIGICO D5 GOES TROPPO IN DARWIN

Top End Sounds in Darwin has invested in a DiGiCo D5 live digital mixing system

"We think that most acts and operators coming through will find the DiGiCo D5 acceptable", said Top End boss Colin West. "There are already ten in Australia so they're not a virgin console; they've been well and truly proven to be reliable."

David Houghton, TES chief audio engineer who ran the audio for the Qantas Gala (see photo), was reportedly more than comfortable using the console after just one day, a scenario repeated at three more gigs during the week by other operators at TES.
